

Table of Contents

Preface	XIII
Symposium Organization	XV
Acknowledgements	XIX
 <i>Keynote lectures</i>	
Life-cycle considerations in risk-informed decisions for design of civil infrastructures <i>A.H-S. Ang</i>	3
Structural integrity monitoring for dependability <i>S. Arangio, F. Bontempi & M. Ciampoli</i>	11
Practical approaches to the application of life-cycle civil engineering for infrastructures in Korea <i>H.-N. Cho</i>	21
Life cycle optimization in earthquake engineering <i>L. Esteva</i>	35
Life-cycle cost of civil infrastructure with emphasis on bridges <i>H. Furuta & D.M. Frangopol</i>	47
The new life of the Theatre alla Scala <i>P.G. Malerba</i>	59
Life-cycle assessment of marine civil engineering structures <i>T. Moan</i>	73
Increasing a building's life-cycle in regions of high seismic risk <i>M.P. Sarkisian</i>	89
 <i>Life-cycle damage processes</i>	
Mechanical behavior of clay bricks and restoration mortars subject to thermal actions <i>P. Antonaci & P. Bocca</i>	101
Ageing and lifecycle of building envelopes and thin shells made of quasi-brittle conglomerates of glass and epoxy resin <i>F. Aymerich, G.P. Cossu & L. Fenu</i>	107
Concrete composition and service life of reinforced concrete structures exposed to chloride bearing environments <i>L. Bertolini, F. Lollini & E. Redaelli</i>	113
FEM-Models of cathodic protection systems for concrete structures <i>L. Bertolini, F. Lollini, E. Redaelli, R.B. Polder & W.H.A. Peelen</i>	119
Structural behavior of cable-stayed bridges under damage <i>F. Biondini, P. Limonta, P.G. Malerba & R. Stucchi</i>	125

Damage propagation and structural robustness <i>F. Biondini & S. Restelli</i>	131
Increasing durability of recycled cement bound materials: laboratory investigation on the effects of bituminous emulsions <i>G. Da Rios, E. Toraldo & E. Mariani</i>	137
Life cycle deterioration and cost comparison of bridge deck designs including rehabilitation strategies <i>L.R. Feldman, M. Boulfiza, J. Zaccaruk, P.N. Christensen & G. Sparks</i>	143
In-situ chemical analysis for life cycle health management <i>M. Ghandehari</i>	149
Comparison of corrosion accelerated tests performed in reinforced concrete structures using voltage and current induction <i>A.G. Graeff, A.S. Torres & L.C.P. Silva Filho</i>	153
Influence of localized corrosion of steel bars on structural performance of reinforced concrete beams <i>H. Hamada, E. Kato, M. Iwanami & H. Yokota</i>	159
Development of a damage-recovery relationship based on variable re-curing of fire-damaged high-strength mortar <i>M. Henry, T.H. Ahn, Y. Kato & T. Kishi</i>	165
New developed expansive ultra rapid hardening fiber reinforced concrete for bridge deck repair <i>I. Iwaki, S. Banchi & Y. Koda</i>	171
Corrosion characterization of reinforcing bar in existing RC structure <i>E. Kato, M. Iwanami, H. Yokota & H. Hamada</i>	177
Reasons for repair need in Finnish concrete facades in practice <i>J. Lahdensivu & S. Varjonen</i>	183
The effects of mineral additions on chloride penetration into concrete under the frost action <i>B. Li & L. Tang</i>	189
Stochastic modeling of corrosion propagation for service life prediction of chloride contaminated RC structures <i>Z.-H. Lu, Y.-G. Zhao & K. Yu</i>	195
The critical role of marine bacterial processes in the development of models for pitting corrosion of structural steels <i>R.E. Melchers</i>	203
Feasibility analysis of the use of stainless steel reinforcement for concrete members subjected to aggressive exposure conditions <i>C. Molins, E. Real & L. Medina</i>	209
Seismic loss estimation based on end-to-end simulation <i>M. Muto, S. Krishnan, J.L. Beck & J. Mitrani-Reiser</i>	215
Fatigue damage measures with a statistical model for the Wöhler field <i>M.L. Ruiz-Ripoll, A. García, E. Castillo, A. Fernández-Canteli & R. Koller</i>	221
Discussion concerning the multi-ranked deterioration forecasting model based on incomplete inspection data <i>Y. Shumuta</i>	227
The behavior of a building as a part of its conceiving <i>V. Spigai & E. Dalla Vecchia</i>	233

Effect of spatially variable corrosion damage on strength and time-dependent reliability of RC beams <i>M.G. Stewart & Q. Suo</i>	239
Service-life performance of reinforced concrete structures in corrosive environments <i>D.V. Val & L. Chernin</i>	247
Effect of cracking on long-term performance of reinforced concrete slabs <i>T. Yamamoto</i>	253
Dilatometric tests combined with computer simulations and parameter identification for in-depth diagnostic analysis of concrete dams <i>A. Zirpoli, G. Maier, G. Novati & T. Garbowski</i>	259
 <i>Life-cycle assessment and design</i>	
Life-cycle analysis of buildings with R/C frames <i>D.O. Astafiev & I.A. Fedotova</i>	267
Direct Displacement Based Design and Force Based Design of precast concrete structures <i>A. Belleri & P. Riva</i>	273
Lifetime seismic performance of precast reinforced concrete industrial buildings <i>F. Biondini, A. Palermo & G. Toniolo</i>	279
Life-cycle multi-objective optimization of deteriorating structures <i>F. Biondini & G. Zani</i>	285
Fatigue design of precast structural concrete plates for access floors <i>M. Breccolotti, A.L. Materazzi & I. Venanzi</i>	293
Integration of degradation prognosis of concrete structures into life cycle management <i>H. Budelmann, K. Hariri & T. Starck</i>	299
Increasing pavements durability through construction: a model for compaction design <i>M. Crispino, E. Mariani & R. Rampini</i>	305
Service life predictions for new and rehabilitated concrete bridge structures <i>B. Czarnecki & R.L. Day</i>	311
Combined reinforcement <i>B. De Rivaz</i>	317
New aspects on bridge design for durability <i>M. Empelmann, V. Henke, G. Heumann & M. Wichers</i>	323
Fuzzy probabilistic analysis of prestressed concrete structures <i>L. Giordano, G. Mancini & F. Tondolo</i>	329
Modeling maximum live load effects on highway bridges <i>M. Ghosn, B. Sivakumar & F. Moses</i>	335
Analysis of the local ductility in reinforced concrete beams dimensioned according to Eurocode 8 <i>A. Kassoul, A. Bougara, M. Belkhatir & K. Ezziane</i>	343
Serviceability as a significant factor of the bridge life-cycle <i>V. Kristek & L. Vrablik</i>	349
Inspection and evaluation of existing structures: a task for brave engineers <i>J. León, H. Corres-Peirretti & F. Prieto</i>	355
Minimum life-cycle cost design and optimal earthquake intensity decision-making of aseismic structures based on finite element reliability analysis <i>D.-G. Lu, X.-H. Yu, G. Li & G.-Y. Wang</i>	361

Evaluation of the response of concrete structures along their service life by nonlinear evolutive analysis methods	367
<i>A.R. Marí & J.M. Bairán</i>	
Strengthening of aged RC structures using spreadsheet analyses with optimisation methods and linearised moment-curvature relations	373
<i>P. Mark</i>	
Uncertainty in structural capacity and influence on seismic demand and damage	379
<i>M. Mezzi</i>	
Cost-based design and renewal strategy for long-life structures	385
<i>J. Menčík</i>	
Probabilistic treatment of bridge monitoring data and associated errors for reliability assessment and prediction	391
<i>T.B. Messervey & D.M. Frangopol</i>	
Life-cycle design of residential buildings: appearance and reality of ecological assessments	397
<i>M. Michlmair & P. Maydl</i>	
The influence of design and detailing on the life and maintenance of a bridge	403
<i>A.G. Mordey</i>	
Life-cycle performance of structures: combining expert judgment and results of inspection	409
<i>L.C. Neves & D.M. Frangopol</i>	
Bending performance of reinforced concrete member deteriorated by corrosion	415
<i>M. Oyado, T. Sato, T. Kanakubo & Y. Yamamoto</i>	
Investigating the effects of corrosion on 45-year-old prestressed concrete bridge beams	421
<i>T.M. Papé & R.E. Melchers</i>	
Analytical modelling of FRP strengthened steel beams	427
<i>C. Pellegrino, E. Maiorana & C. Modena</i>	
Estimation of life-cycle fatigue damage for suspension bridge hangers	433
<i>F. Petrini & F. Bontempi</i>	
Safety assessment of civil engineering structures throughout their life-cycle	439
<i>R. Pukl, D. Novák & B. Teplý</i>	
Reliability-based fatigue assessment of welded connections	445
<i>S.G. Reid</i>	
Simple supported RC bridge design process considering durability	451
<i>X. Ruan, A.-R. Chen & Z.-C. Pan</i>	
Probabilistic durability design of RC structures in Persian Gulf using DuraPGulf model	457
<i>M. Shekarchi, A. Rafiee, H. Layssi & F.M. Marani</i>	
Strengthening with textile reinforced concrete—reliability based design with imprecise probability	463
<i>J.-U. Sickert, W. Graf & S. Pannier</i>	
Fatigue life of precast decks of high speed railway bridges	469
<i>C.F. Sousa, R. Calçada & A.S. Neves</i>	
Nonlinear dynamic analysis of frames with arbitrary plastic hinges	475
<i>Z.H. Yan & F.T.K. Au</i>	
 <i>Life-cycle monitoring, maintenance, and rehabilitation</i>	
Life-cycle reliability analysis and selective maintenance of deteriorating structures	483
<i>F. Biondini, D.M. Frangopol, E. Garavaglia</i>	

A comparison of tomographic reconstruction algorithms for acoustic non destructive testing of stone masonry <i>B. Cannas, S. Carcangiu, M. Di Mauro, A. Fanni, A. Montisci, M.L. Mulas & G. Concu</i>	489
Features extraction techniques for sonic and ultrasonic NDT on building materials <i>B. Cannas, F. Cau, M. Usai & G. Concu</i>	495
Measuring the displacements of a steel structure by GPS units <i>F. Casciati & C. Fuggini</i>	501
Including structural monitoring activities in safety probabilistic formulations <i>R. Ceravolo, A. De Stefano & M. Pescatore</i>	507
Maintenance strategies for large span suspension bridges against fatigue and corrosion <i>A.-R. Chen, Y. Zeng & R. Ma</i>	513
Bridge management system techniques application to Italian highways network <i>A. D'Andrea, D. Oggioni & E. Spallarossa</i>	519
Behavior of RC bridge girders strengthened with CFRP laminates <i>A. El-Safty</i>	525
Aspects of sustainability of repair-systems for concrete structures <i>M. Empelmann, V. Henke, G. Heumann & M. Wichers</i>	531
Experimental identification of cable damping parameters towards robust design against aeroelastic instability <i>L. Faravelli & F. Ubertini</i>	535
Seismic retrofitting of bridges <i>G. Furlanetto, L. Ferretti Torricelli & A. Marchiondelli</i>	541
Widening and strengthening of bridge decks with composite materials <i>G. Furlanetto & R.L. Pefano</i>	547
Maintenance and inspection of stay cables using prestressing steel at a German bridge <i>C. Gläser & H. Weiher</i>	553
Assessment of bridge capacity through proof load testing <i>J.D. Gómez & J.R. Casas</i>	559
Strengthening reinforced concrete T connections by steel straps <i>M.N.S. Hadi</i>	565
Development of a software-tool for the life-cycle management of bridges <i>M. Kluth, A. Borrmann, E. Rank, T. Mayer & P. Schiessl</i>	571
Traffic load modeling based on structural health monitoring data <i>C. Lan, H. Li & J. Ou</i>	577
Corrosion detection in reinforced concrete structures using static and dynamic response measurements <i>F. Lanata & A. Del Grosso</i>	583
Prediction and quantification models of bridge condition in Korea <i>K.-J. Lee, S.-H. Park, C.-H. Park, K.-H. Park & J.S. Kong</i>	589
Lifespan evaluation of 8 bridges of the Indiana Toll Road: A case study <i>J. León, H. Corres-Peirretti, S. Pérez-Fadón, J.E. Herrero, F. Rodríguez & F. Prieto</i>	595
Birth certificate as an important tool for public-private-partnership projects <i>T.F. Mayer, P. Schießl & M. Zintel</i>	601
Invention of crack inspection system using a light wave survey camera with a built-in crack scale <i>K. Nakaniwa, M. Maeda, Y. Koyama & T. Asakura</i>	607
Structural health monitoring for life cycle management of bridges <i>F.N. Catbas, M. Gul, R. Zaurin, H.B. Gokce, D. Maier & T. Terrell</i>	613

Peeling failure along the interface in FRP-strengthened beams subjected to transverse loads <i>E. Oller, A.R. Mari & D. Cobo</i>	619
Optimal inspection and maintenance strategies for bridge network using supply and demand approach <i>A.D. Orcesi & C.F. Cremona</i>	625
The life-cycle maintenance strategy for the bridge system <i>K.-H. Park, S.-Y. Lee, J.-H. Kim, J.-S. Kong & H.-N. Cho</i>	631
Life time assessment of steel bridges via monitoring and testing <i>U. Peil, M. Frenz & I. Schendel</i>	637
A risk ranking strategy for network level bridge management <i>S. Sathananthan, M.I. Rafiq & T. Onoufriou</i>	643
Monitoring based structural performance assessment <i>A. Strauss, D.M. Frangopol & S. Kim</i>	649
On the road of multi-performance profiles aided maintenance <i>A. Talon, D. Boissier & J. Hans</i>	655
Development of a work carriage for tunnel maintenance <i>H. Terato, K. Yokozawa, N. Takemoto, Y. Miura & Y. Inagawa</i>	661
Selection of repair method for concrete facades <i>S. Varjonen & J. Lahdensivu</i>	667
Monitoring based performance prediction of steel bridges against traffic loading exemplified at the Europabrücke <i>R. Veit-Egerer & H. Wenzel</i>	671
A maintenance concept for concrete tunnel linings in soft soil conditions <i>A.H.J.M. Vervuurt, G.A. Leegwater & R.B. Polder</i>	677
Inspection of bridges in Austria—Practice and outlook <i>R. Wendner, S. Hoffmann, A. Strauss, K. Bergmeister & R. Geier</i>	683
 <i>Life-cycle performance of special structures</i>	
Probability-based durability design and performance-based concrete quality control of a concrete harbor structure <i>V. Årskog & O.E. Gjørsv</i>	691
Structural safety evaluation of a r.c. arch bridge <i>A.M. Avossa, P. Famigliuolo & P. Malangone</i>	697
Towards life-cycle assessment of foundations of guyed towers in electrical transmission lines <i>C.B.P. Azevedo & S.M.C. Diniz</i>	703
Life-cycle performance of bridge decks in aggressive environments <i>F. Biondini, D.M. Frangopol & P.G. Malerba</i>	709
Structural reliability of the "Palazzo della Civiltà Italiana" in Rome EUR <i>C. Ceccoli, T. Trombetti & D. Biondi</i>	715
Maintenance and rehabilitation of the "Incoronata" viaduct along the Salerno Reggio Calabria highway <i>C. Ceccoli, T. Trombetti, A. Forlani & F. Baroni</i>	721
Experiment based performance prediction of long span bridges subjected to non-uniform excitation <i>M.M.S. Cheung & C.Y. Yang</i>	727
Functionality and strength of arch concrete dams cracked by shrinkage <i>M. Como & S. Imperatore</i>	733

Effects of soil-structure interaction on the seismic damageability of coupled wall-frame structures on pile foundations <i>F. Dezi, S. Carbonari & G. Leoni</i>	739
Rehabilitation and modernization of the Monte Bianco Tunnel <i>G. Furlanetto & L. Ferretti Torricelli</i>	745
Design of durable bridges by using self-compacting concrete filled steel tubes <i>G. Furlanetto, L. Ferretti Torricelli & A. Marchiondelli</i>	751
Structural reliability analysis and monitoring program applied to a roller-compacted concrete dam <i>C.M. Krüger, A. Chaves Neto & D.A.V. Krüger</i>	757
Seismic vulnerability of historical buildings: the Royal Palace of Naples <i>F.M. Mazzolani, B. Faggiano, A. Marzo, E. Guglielmo & P. Mascilli Migliorini</i>	763
Effect of unsteady aerodynamic admittances on life cycle of guyed masts <i>U. Peil & M. Clobes</i>	769
Medium-term life-cycle monitoring of random behaviour components of in-service pile-supported wharves <i>H. Yáñez-Godoy, J. Boéro & F. Schoefs</i>	775
 <i>Life-cycle cost of structures and infrastructures</i>	
Maintenance—LCC analysis based on real data <i>C. Bahr & K. Lennerts</i>	783
A new efficient methodology for large scale outsourcing of maintenance <i>J. Bakker, P. Boersma & J. Volwerk</i>	787
Life cycle cost evaluation of the as-built cover layer in reinforced concrete bridge decks <i>C.L. Barnes & J.-F. Trottier</i>	793
Recycling C&DW: a way for closing the concrete loop <i>V. Corinaldesi, G. Moriconi & L. Dezi</i>	799
Life Cycle Cost Analysis in pavement type selection: state-of-the-practice <i>Z. Guven, P.R. Rangaraju & S.N. Amirkhanian</i>	805
Financial viability of TPSM applied continuous composite bridges <i>J.-H. Kim, J.-H. Ahn, C.-Y. Jung, & S.-H. Kim</i>	811
Effect of cumulative seismic damage on life-cycle cost of reinforced concrete bridges <i>R. Kumar, P. Gardoni & M. Sanchez-Silva</i>	819
An information model for life-cycle cost management of cable-stayed bridge <i>S.H. Lee, M.G. Huang, B.G. Kim & Y.H. Park</i>	825
Guidelines for LCC analysis and evaluation of public construction projects in Korea <i>T.K. Kang & Y.S. Lee</i>	829
Design of green engineered cementitious composites for pavement overlay applications <i>M.D. Lepech, G.A. Keoleian, S. Qian & V.C. Li</i>	837
Development of life-cycle cost based budget allocation system for bridge group <i>A. Miyamoto & H. Uchino</i>	843
LCC case studies for bridges in different design phases <i>S. Noponen & A. Jutila</i>	851
Life-cycle cost assessment and service life estimate of precast concrete culverts <i>D.K. Panesar, C.J. Churchill, S.E. Chidiac & E. Kling</i>	857

A successive LCC model development of marine RC structures exposed to chloride attack using a Bayesian approach	863
<i>H. Park, H. Jung, J. Kong & G. Zi</i>	
Optimal floor plan design of high-rise apartment buildings based on life-cycle cost consideration	871
<i>K.J. Park & A.H-S. Ang</i>	
Life-cycle cost analysis for fire protection of buildings	877
<i>L. Razdolsky</i>	
FRP bridge deck life cycle cost analyzer	883
<i>S. Sahirman, R.C. Creese & H.V.S. GangaRao</i>	
Life cycle cost and function analysis in value based design decision	889
<i>C. Utomo & A. Idrus</i>	
Equipment replacement decisions based on life-cycle cost analysis	895
<i>J. Weissmann & A.J. Weissmann</i>	
Life cycle analysis of waterfront structures (a qualitative process model)	901
<i>J.L. Wilson & C.B. Kubic</i>	
An integrated life cycle assessment and life cycle analysis model for pavement overlay systems	907
<i>H. Zhang, G.A. Keoleian & M.D. Lepech</i>	
 <i>Life-cycle oriented computational tools</i>	
Advanced fragility curves of Interdependent Lifelines Using Decision Making Process	915
<i>M.N. Alexoudi, K.G. Kakderi & K.D. Pitilakis</i>	
Intelligent agents for life cycle management of structures and infrastructures in seismic areas	921
<i>G.M. Atanasiu, F. Leon & M.H. Zaharia</i>	
Hierarchical ordering of extensometers readings from Itaipu dam	929
<i>A.S. Dyminski, M.T.A. Steiner & R. Villwock</i>	
Algorithm for identification of damage on bridge piers	935
<i>A.S. Kiremidjian, P. Sarabandi, A. Cheung, C. Cabrera, K.K. Nair & G. Kiremidjian</i>	
Analysis, heuristics, and uncertainty of hybrid life cycle assessment: agriculture and construction case studies	941
<i>A.E. Landis & M.M. Bilec</i>	
Advanced performance evaluation system for existing concrete bridges with machine learning	947
<i>A. Miyamoto & J.-I. Ishida</i>	
Cost versus sustainability of reinforced concrete building frames by multiobjective optimization	953
<i>I. Payá-Zaforteza, V. Yepes, F. González-Vidosa & A. Hospitaler</i>	
Model based reasoning for life-cycle structural engineering	959
<i>I.F.C. Smith & P. Kripakaran</i>	
Value analysis for decision making on highway cross-sections	965
<i>N. Villegas, B. De los Ríos, A. Aguado & R. Núñez</i>	
Author index	971
